

Getting video from the Flip Cam to your computer

1. After connecting your camera to the computer this window will pop up. From this list of selections, choose **Open folder to view files using Windows Explorer**.
2. Open the **DCIM** folder and then open the **100video** folder.
3. In this folder you will see your video(s). Select the videos you want to use, then drag and drop those videos in the folder of your choosing (you will be using the folder you created in the E:drive).
4. Open **Windows Movie Maker** from your applications menu.
5. From the task list on the left choose **import video**. Next, find and select the video files you saved to the E:drive folder you created.
6. Your video will now show in the collection window of Movie Maker. Drag your clip(s) onto the storyboard and begin the editing process.
7. Once you have made all your edits and are ready to finish your movie, select **Save to my computer** from the *Finish Movie* task bar on the left.

- Capture from video device
